Experience

Dahlia - Frontend Developer Intern   *Dec 2023 - Jan 2024*
- Led the development of an MVP for a personalized matchmaking platform, using a modern tech stack including **Next.js, Tailwind CSS, and JavaScript**, building a dashboard and actively resolving bugs to improve user experience and page load time by **48%**.
- Collaborated with the **team of 5** developers to improve the frontend and user interface design.
- Managed projects using **Jira** for Agile task management and **Confluence** for streamlined documentation.
- Developed backend functionalities using **PostgreSQL** and **Express.js**, enhancing my full-stack proficiency.
- Leveraged agile methodologies to optimize project execution, achieving improvement in project delivery timeliness and fostering a **30%** increase in team communication through daily stand-up meetings.

BTST Solutions - Frontend Developer Intern   *Oct 2023 - Dec 2023*
- Improved user experience by implementing the **Atomic Design methodology**, creating a highly efficient design system with reusable atoms and molecules. This optimization resulted in a remarkable **30%** enhancement in page loading.
- Developed more than **25** reusable UI components with **Tailwind**, ensuring consistent and polished user interface
- Leveraged **Storybook** to streamline UI component development and facilitate efficient testing, maintaining a clean and consistent codebase through automated code formatting with **Husky & Prettier**.

HappyliEver - Web Developer Mentee   *July 2023*
- Built reusable UI components and mentored by senior developers to build a functional chatbot using **React Chatbot-Kit** and **Redux**, streamlining user interactions.

Projects

Book Store - MERN Stack *Github*   *Aug - Sept 2023*
- Engineered full-stack bookstore application with MongoDB, Express.js, Node.js, React.js, Axios and deployed on Vercel. This application allows users to seamlessly manage a book collection through CRUD operations.

LinkedIn Clone - React.js, Redux, Firebase, Material UI *Github*   *April - May 2023*
- This is a LinkedIn replica webpage using react.js, redux, Firebase for authentication and post functionality, hosted on Netlify. This project demonstrates proficiency in state management and user authentication.

Personal Portfolio - Next.js, TypeScript, Sanity, Tailwind, Vercel, Framer *Github*   *Jun 2023*
- Created a dynamic portfolio using Next.js SSR, integrating Sanity.io as a CMS for showcasing skills and experiences.

Skills

- **Languages:** Java, Python, Javascript, Typescript, HTML, CSS
- **Frameworks**: React.js, Next.js, Redux,TailwindCSS, Node.js, Express.js, RestAPI, MongoDB
- **Tools**: Git, MaterialUI, Firebase, Appwrite, Framer, Jira, Confluence, Storybook, Husky, Figma
- **Knowledge:** Docker, AWS, Kubernetes, Data Structures & Algorithms, OOPs, RDBMS

Achievements

Hacktoberfest 2023 : Successfully raised 4 (+more) pull requests that got merged within October.
GSSOC 2023: Contributed to projects and documentations of open source projects.
Hanko Hacksquad Hackathon : Participated with an Image Gallery app with Next.js and Hanko authentication and integrated Supabase as backend database and also wrote a blog post.
Appwrite Hashnode Hackathon : Created a Todo application powered by Appwrite backend and React.js. Additionally, authored a blog post highlighting communication skills alongside the technical intricacies of the project.

Education

VEER KUNWAR SINGH UNIVERSITY Bachelors in Commerce - *Accounts & Finance (2018 - 2022)*
